

**St. Louis County Planning Dept.
Office of Community Development
LEAD HAZARD REMEDIATION PROGRAM**

Our office has received funds for Lead Hazard Remediation for homeowners that live in houses built before 1978. It is a 5-year Forgivable Loan, meaning if the homeowner remains in the home for five years, the loan is forgiven and no money is owed.

To qualify for the program, you must:

1. Own your own home
2. Have a child under 6 years old either living in the home or frequently visiting the home
3. Have mortgage taxes paid

After the applicant is in the program, we schedule an appointment to test your home for Lead Paint. If Lead Paint is found, one of our Missouri Lead Qualified Contractors will schedule a time and date to remove the Lead Hazards.

An example of work that is done is as follows: If Lead Paint is found on the old window, the contractor will remove that window and replace it with a new Vinyl window. Please note that Metal windows will not have Lead Paint.

If you are interested in applying for the Lead Hazard Program, please contact **Judi Candela** at **314-615-1642**.
